ABOUT THE ACTIVE ECOMMERCE SHIPROCKET ADD-ON

The Active eCommerce Shiprocket Add-on integrates the Shiprocket shipping system directly into your marketplace to enable a fully unified and automated order fulfillment workflow. It allows admins to configure Shiprocket credentials, manage pickup addresses, define box sizes, select courier partners, schedule pickups, and generate AWB labels directly from the admin panel. By eliminating the need to access Shiprocket separately for courier selection, pickup scheduling, and tracking, the add-on centralizes the entire shipping lifecycle into one interface. This ensures faster order processing, reduced manual effort, real-time delivery status updates, and a reliable, hassle-free shipping experience for admin-managed orders.

1. Install the Script

To install the Shiprocket Addon, you need to follow the steps below:

- **Step 1: Prerequisite**

Before proceeding, ensure that **Active eCommerce CMS** is already installed and running on your server. The Shiprocket Addon works as an extension and requires the CMS to function.

- **Step 2: Purchase & Download**

Purchase the **Active eCommerce Shiprocket Addon** from the official marketplace or provider. After completing the purchase, download the addon file, which will be in a zipped format.

- **Step 3: Activate the Active eCommerce Shiprocket Add-on**

→ Following the given procedure below will activate the **eCommerce Shiprocket Add-on** for your domain, and you'll be able to use the script smoothly:

→ **Open Activation Page**

Open the link in the browser <https://activeitzone.com/activation/addon>

→ **Requirements**

- A valid purchase code from **CodeCanyon**. (Both Active eCommerce CMS and Active eCommerce Shiprocket Add-on)
- Your **CodeCanyon username**.

→ **Activation Details**

In the respective fields, **Enter Name, E-mail, Main Item Purchase Code, CodeCanyon Purchase Code, CodeCanyon Username, Domain Name, Select the Main Item**, and Select the specific **Addon** from the dropdown list.

→ **Submit the Form**

Click the **"Activate"** button at the bottom of the form.

- **Step 4: Access the Admin Panel**

Log in to the admin panel of your Active eCommerce CMS using your administrator credentials. Navigate to the Addon Manager section in the admin dashboard.

- **Step 5: Install the Addon**

Inside the Addon Manager, click on the Install New Addon button.

- A file upload window will appear. Click on **Choose File** and select the downloaded zip file from your system.
- Enter the purchase code of Active eCommerce CMS & Active eCommerce Shiprocket Add-on.
- Click on the Install button to begin the installation process.

→ Once the installation is complete, a success message will confirm that the addon has been installed.

- **Step 6: Locate the Shiprocket Addon**

After successful installation, you will find the **Shipping System** Menu added to the left sidebar of your admin panel.

- **Step 7: Ready to Use**

The Shiprocket Addon is now installed and fully operational. Now you need to **configure the Shiprocket Addon**.

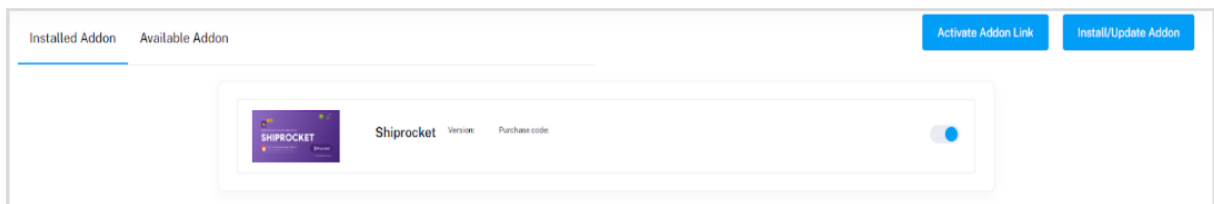

Figure 1: Addon Manager in Admin Panel of Active eCommerce CMS

2. Features Included in the Shiprocket Add-on

The Shiprocket Add-on integrates Shiprocket directly into the platform, enabling admins to ship in-house products (and seller products managed by the admin) through automated pickup, packaging, courier selection, and dispatch workflows. Once activated, it enhances the existing order management interface by introducing shipping configuration pages, real-time Shiprocket status updates, and advanced order-level shipping controls.

Key features included in this add-on are:

- Secure authentication with Shiprocket using admin credentials
- Pickup address management synced with Shiprocket
- Shipping box size configuration for accurate packaging
- Courier partner selection directly from the order detail page
- Pickup scheduling based on courier availability
- Automatic AWB generation and label download
- Real-time delivery status updates synced from Shiprocket

This add-on removes the need for manual courier handling and external dashboard navigation by managing the entire shipping process within Active eCommerce CMS.

3. Shiprocket Integration Overview

This add-on connects the admin's Shiprocket account with the eCommerce system to manage the complete shipping lifecycle from order confirmation to delivery tracking. Once integrated, the system communicates with Shiprocket in real time to fetch available courier partners, pickup schedules, AWB numbers, and delivery statuses.

Through this integration, admins can:

- Authenticate and manage Shiprocket access securely
- Configure pickup locations and packaging dimensions
- Select courier partners per order based on availability
- Schedule pickups directly from the order details page
- Generate AWB numbers and download shipping labels
- Track delivery progress automatically without manual updates

By centralizing courier selection, pickup scheduling, and shipment tracking, the integration ensures a smooth and consistent fulfillment workflow across all admin-managed orders.

4. Shiprocket Settings

To use Shiprocket features, the admin must configure the API credentials first.

- **Access Shiprocket Settings**
Navigate to **Shipping System** → **Shiprocket Configuration**
- **Activate Shiprocket by turning on the radio button.**
- **Required Fields:**
 - Shiprocket Email
 - Shiprocket Password

Once filled, click **Save Configuration** to authenticate the connection.

A valid connection is required before any order can use Shiprocket in the Shipping System dropdown.

Figure 2: Configuration of Shiprocket Addon in Admin Panel of Active eCommerce CMS

5. Pickup Address Management

Pickup addresses define the physical locations from which **Shiprocket will collect packaged orders**. The admin must configure at least one pickup address before using Shiprocket for order deliveries.

Multiple pickup addresses can be added to support businesses operating from **multiple warehouses, offices, or storage locations**.

- Navigate to **Admin Panel → Shipping System → Pickup Address**.

This opens the All Pickup Addresses page.

- **All Pickup Addresses Page Overview**

The Pickup Address listing page includes the following components:

→ Section Tabs

- **All Addresses** – Displays all pickup addresses
- **Active** – Displays only enabled pickup addresses
- **Inactive** – Displays disabled pickup addresses

→ Bulk Action

- **Bulk Action Dropdown (Delete)** – Allows deleting multiple selected pickup addresses at once.

→ Search & Action Controls

- **Search Addresses** – Search pickup addresses by nickname
- **Add New Pickup Address** – Opens the pickup address creation page

- **Pickup Addresses Table**

Each pickup address is displayed in a table with the following columns:

- **Checkbox** – Select one or multiple addresses for bulk actions

- **Courier Type** – Displays the courier service (e.g., Shippocket)
- **Address Nickname** – The pickup address name (must match Shippocket account)
- **Status** – Toggle to enable or disable the pickup address
- **Options** – Three-dot menu with **Edit** and **Delete** actions

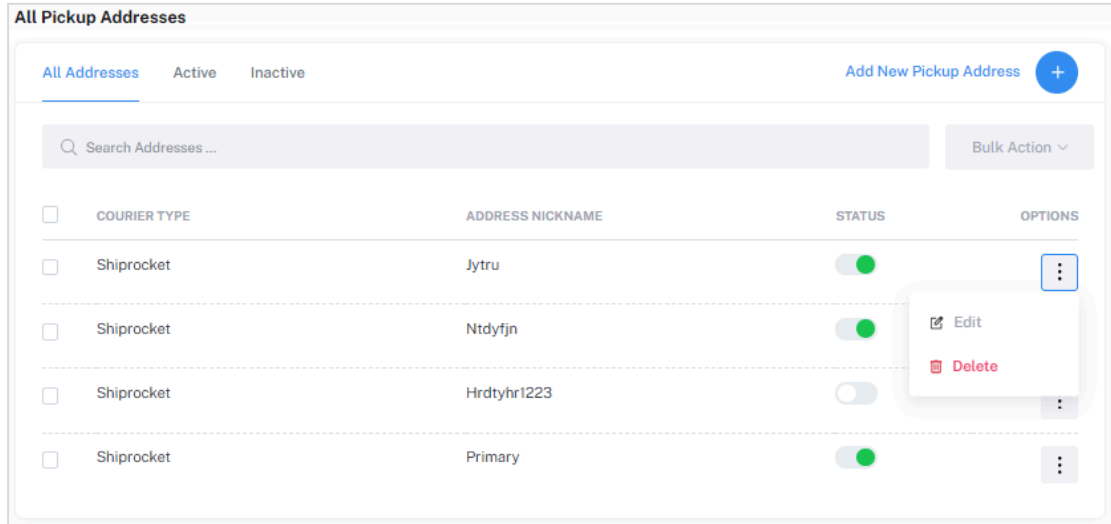

Figure 3: Pickup Address page in Shippocket Addon of Active eCommerce CMS.

- **Adding a New Pickup Address**

To add a pickup address:

- Click **Add New Pickup Address**
- You will be redirected to the **Pickup Address Information** page

- **Pickup Address Information Fields**

On this page, the admin must provide the following details:

- **Courier Type *** – Select Shippocket from the dropdown
- **Address Nickname *** – Enter the pickup address nickname exactly as defined in the Shippocket dashboard

Figure 4: Adding New Pickup Address in the Shippocket Addon

- After entering the required information, click **Save** to add the pickup address.

→ Once saved, the pickup address becomes available for selection when processing orders via **Sales → Orders → View → Shipping System (Shiprocket)**

- **Managing Pickup Address Status**

- Pickup addresses can be **enabled or disabled** using the **Status toggle**
- Only **Active pickup addresses** are available for selection during order shipping
- Disabling an address does not delete it, but removes it from the order workflow

Note:

- *The **Address Nickname** must exactly match the pickup address nickname already added in the **Shiprocket account profile**.*
- *Every Shiprocket-shipped order must be assigned a pickup address*
- *Pickup addresses determine where Shiprocket will collect the order*
- *Address selection happens during order management, not during creation*

6. Shipping Box Size Configuration

Shiprocket requires dimensions to calculate packaging and shipping rates.

Admins must configure box sizes in advance so they can be selected during the order shipping process.

- Navigate to Admin Panel → Setup & Configurations → **Shipping** → **Shipping Box Size Configuration**
- **To Add a New Box Size**
 - Click: **Add New Box Size**
 - The admin is redirected to a form where the following details are required:
 - **Courier Type*** (Dropdown — *Shiprocket*)
 - **Box Length (cm)***
 - **Box Breadth (cm)***
 - **Box Height (cm)***
 - Click **Save** to store the box size.

- **All Box Sizes Table**

After saving, the box size appears in the listing with the columns: **Courier Type**, **Length**, **Breadth**, **Height**, and **Options** (Edit, Delete).

Admins can **add multiple box sizes** to support different product types and packaging needs, **search** for specific box sizes, and perform **Bulk deletion** of box sizes from this page

All Box Sizes Add New Box Size

7. Using Shiprocket When Managing an Order

This section explains **where**, **when**, and **how** Shiprocket is used while managing orders from the admin panel once all required configurations are complete (Shiprocket login, pickup address, and box sizes).

- **Applicable Order Types:**

The Shiprocket is available **only for admin-managed orders**, including:

→ **In-house Orders**

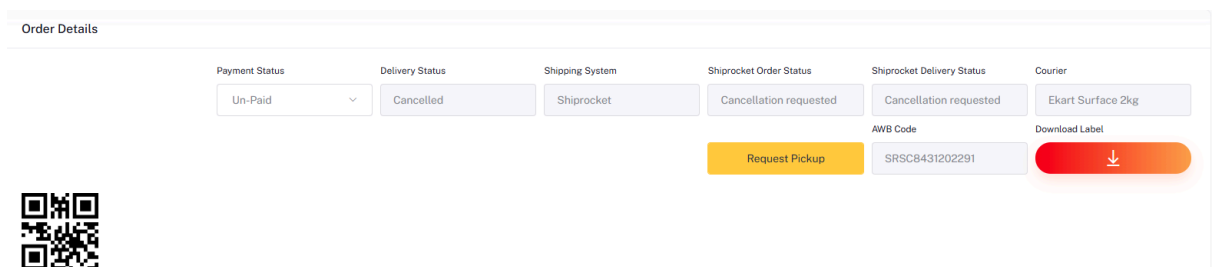

→ **Seller COD Orders:** Only if **Seller Product Manage By Admin** option is enabled under Setup & Configurations → Features Activation page.

If an order does not fall under these conditions, the Shiprocket option will not be available.

- **Accessing the Shiprocket in Orders**

→ Navigate to Admin Panel → Sales → All Orders / Inhouse Orders → **View**

→ In the **Order Details** page, a new dropdown field appears: **Shipping System** → **Shiprocket**, besides the standard order controls (Payment Status, Delivery Status).

The screenshot shows the 'Order Details' page. At the top, there are several status dropdowns: 'Payment Status' (Un-Paid), 'Delivery Status' (Cancelled), 'Shipping System' (Shiprocket), 'Shiprocket Order Status' (Cancellation requested), 'Shiprocket Delivery Status' (Cancellation requested), and 'Courier' (Ekart Surface 2kg). Below these, there is a 'Request Pickup' button, an 'AWB Code' field (SRSC8431202291), and a 'Download Label' button. A QR code is visible on the left side of the page.

Figure 7: Selection of Shiprocket from a sale's order details page

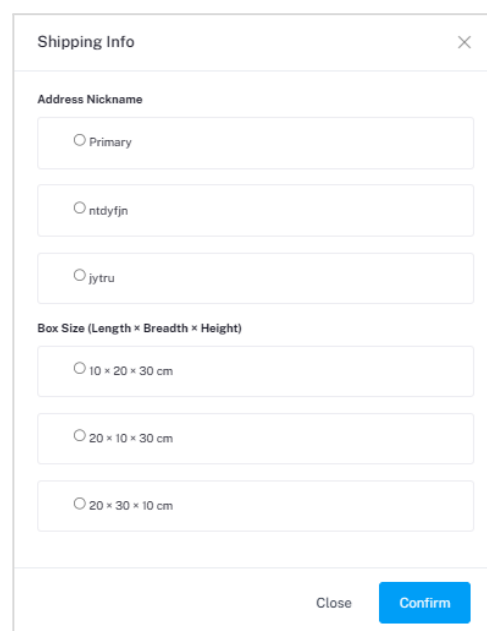

- **Shipping Workflow Using Shiprocket**

→ Once **Shiprocket** is selected from the **Shipping System** dropdown a **Shipping Info** pop-up window appears showing:

- Address Nickname (Pickup Address)
- Box Size (Length × Breadth × Height)

→ Select the pickup address and box size for this order.

→ Click **Confirm** to proceed or click **Close** to cancel.

The screenshot shows the 'Shipping Info' pop-up window. It has a title bar with a close button. Below the title, there are two sections: 'Address Nickname' and 'Box Size (Length × Breadth × Height)'. The 'Address Nickname' section has three radio buttons with labels: 'Primary', 'ntdyfjn', and 'jytru'. The 'Box Size' section has three radio buttons with labels: '10 × 20 × 30 cm', '20 × 10 × 30 cm', and '20 × 30 × 10 cm'. At the bottom right, there are two buttons: 'Close' and 'Confirm'.

Figure 8: Selection of Address Nickname and Box Size of previously selected Shiprocket

- **Courier Selection & Pickup Scheduling**

After confirming the address and box size:

- A new dropdown box, **Courier**, appears in the Order Details page
- The system automatically fetches **available courier partners** from Shiprocket.
- The admin selects a courier from the list

Once a courier is selected:

→ A new button, **Request Pickup**, appears in the Order Details page.

- Clicking on '**Request Pickup**' option, Shiprocket **automatically assigns the pickup schedule** based on courier availability in the request pickup section.
- The assigned pickup date is **added to the order details** and displayed along with other shipping information.
- No manual action is required from the admin to schedule the pickup.
- **AWB Code Fetched, Label & Manifest Download**
After the available courier is assigned
 - AWB code will be automatically fetched from Shiprocket
 - Also Shipping label and Manifest **Download** button appear beside the AWB code.
 - The admin can download the label and Manifest from here.
 - This will need to be printed and attached to the shipping box.

The screenshot shows the 'Order Details' page. It features a table with columns for Payment Status (Un-Paid), Delivery Status (Cancelled), Shipping System (Shiprocket), Shiprocket Order Status (Cancellation requested), Shiprocket Delivery Status (Cancellation requested), and Courier (Ekart Surface 2kg). Below the table, there is a QR code on the left, a 'Request Pickup' button, the AWB Code (SRSC8431202291), and a 'Download Label' button with a download icon.

Figure 9: Courier assignment with fetched AWB code, and label and manifest download buttons on the Order Details page.

8. Fetch Shiprocket Delivery Status

The Shiprocket Add-on supports automatic delivery status synchronization using a server-side cron job. This ensures that order delivery statuses inside Active eCommerce CMS remain up to date with real-time Shiprocket Status that is being fetched.

- **Setting Up the Cron Job in cPanel**

To enable automatic status fetching:

- Log in to your **cPanel**
- Navigate to **Cron Jobs**
- Add a new cron job with the following configuration:
 - **Execution Time:** Every Day
 - **Command:** wget -O - http://yourdomain.com/shiprocket/delivery-status

[1] Replace yourdomain.com with your actual domain

- **Viewing Shiprocket Status**

Once the cron job is active:

- Shiprocket delivery statuses are fetched automatically to the System.

- Admins can view the latest Shiprocket status of their shipment from: Admin Panel → Sales → All Orders / Inhouse Orders → **View**
- The status is updated in real time based on Shiprocket's delivery progress.
- Delivery Status (Visible to customers) also gets automatically updated based on the Shiprocket Delivery Status.

This automation removes the need for manual tracking and updating and ensures accurate delivery visibility throughout the order lifecycle.

9. Fetch Shiprocket Order Status

The Shiprocket Add-on supports automatic shiprocket order status synchronization using a server-side cron job.

- **Setting Up the Cron Job in cPanel**

To enable automatic status fetching:

- Log in to your **cPanel**
- Navigate to **Cron Jobs**
- Add a new cron job with the following configuration:
 - **Execution Time:** Every Day
 - **Command:** wget -O - http://yourdomain.com/shiprocket/order-status

[1] Replace yourdomain.com with your actual domain

- **Viewing Shiprocket Order Status**

Once the cron job is active:

- Shiprocket order statuses are fetched automatically to the System.
- Admins can view the latest Shiprocket order status of their shipment from: Admin Panel → Sales → All Orders / Inhouse Orders → **View**

THANK YOU
